### **DETAILED ACTION**

This Office Action is in response to the amendment filed October 11, 2011, amending claims 129-132 and 176. Currently claims 86-176 are pending.

#### ***Claim Objections***

1. Claims 133-134 are objected to because of the following informalities: claims 133 and 134 recite “the multiple processors computing device of claim 129.” However, claim 129 has been amended to recite “a multiple processors computing system..” Appropriate correction is required.

#### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

*Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 129-134 and 176 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 21-23 of U.S. Patent No. 5,867,818 in view of Garrett (US Patent No. 4,991,217) or Jacobs (US Patent No. 5,956,683). The processes of the method invention of claims 21-23 encompass the functions performed by the system claims of 129 and 176, wherein both sets of claims are directed to executing programming means utilizing configuration states interacting with paths (or events). Although the conflicting claims are not identical, they are not patentably distinct from each other because providing a system with a multiple processor system where the second processor processes information provided by a first processor and/or where computing devices are connected through a communication link are obvious features well known in the art, as indicated by Garrett (Abstract; Figure 3; col. 1, line 62 to col. 2, line 25) and/or Jacobs (Abstract; Figures 2 and 3). Wherein, one having ordinary skill in the art would have recognized the advantages of implementing a dual processing system in the

'818 to implement the claimed programming method to relieve one processor of having to perform all the necessary processing/computations required for the system or providing the processing if one processor is unable or cannot handle the processing.

***Allowable Subject Matter***

4. Claims 86-128 and 135-175 are allowed.

***Response to Arguments***

5. Applicant's arguments with respect to claims 129-134 and 176 have been considered but are moot in view of the new grounds of rejection.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
